Soheil Ghanbary

Frontend Developer

Tehran, Tehran Province, IRAN

Summary

Experienced frontend developer with a strong command of React, Next.js, and TypeScript, skilled in building high-performance, user-centered applications. Proven ability to deliver clean, scalable code and interactive components that enhance user experience and maintain code quality. Proficient in leveraging TypeScript for type safety and Next.js for server-side rendering and optimizations, ensuring robust and secure web solutions. Dedicated to crafting responsive, engaging, and accessible web interfaces that align with modern web standards.

Experiences

Kian Ertebat Arvand (Web Developer)

2017 - 2024 (7 year)

MyRepeater (SEO Engineer)

2018 - 2023 (5 year)

Projects

WebKade (FullStack Developer)

Webkade is a web app designed for sharing and reviewing various websites. It enables quick access to web apps, allows feedback and reviews, and manages saved applications. Key challenges included handling concurrent file uploads, setting up database relationships, implementing authentication, and managing protected route access.

Technologies:

Next.JS

Drizzle ORM

TypeScript

Hono.JS

Tarhino (Frontend Developer)

Tarhino is a Dribbble.com clone built with Next.js and React. This project faced challenges like handling complex data relationships, optimizing performance, secure user authentication, and creating a scalable file upload system. It combines frontend and backend expertise to deliver a responsive, user-friendly design-sharing platform.

Technologies:

Next.JS

Prisma ORM

TypeScript

Server Functions

Moovito (Frontend Developer)

Moovito is a movie streaming app that showcases various films using the TMDB service. Built with Next.js, React, TanStack Query, TailwindCSS, and TypeScript, this project offers an optimized, responsive interface for browsing and discovering movies efficiently.

Technologies:

Next.JS

TypeScript

TailwindCSS

Restful API
